

## Tapping like the professionals. With the top keg you you can tap your beer at home as in the bar.

With the integrated CO2 cartridge and the tapping from the top of the keg, each glass is pure fun while tapping. The entire technology is in the lid. By the CO2 cartridge no oxygen gets into the product, due to this fact the beer keeps fresh for weeks and can always be tapped perfectly.

The tap can be closed again and the Top-Keg is placed back in the refrigerator. Whether personal or professional operation – the Top-Keg makes a good figure.
